

Chapter Assignment Two

Stray Dog Strut

The online assignments are great for learning/testing small parts of the course. To encourage a greater cohesion among the many topics we will cover, I include these chapter assignments.

~~For these, make sure you show and explain your work. Make them look neat.~~

These are 20 points each.

This Chapter Assignment

For this Chapter Assignment, I want you to go to the following URL and solve the Venn game corresponding to your student ID.

<https://courses.kvasaheim.com/math121/venn/>

Once there, provide your student ID and select either practice or assignment. The former gives you opportunities to practice these Venn games. The latter is the actual assignment. Finally, click on “Assignment.”

Fill in the values for the seven regions. Print the page. Write your name at the top. Hand it in at the start of class when it is due.

If you get any of the answer wrong, your grade will be 0. Otherwise, it will be 100%.
